-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Rakuljac et al. (US 5,6,84611) or Kitamura et al. (US 6,373,806) or the admitted prior art shown in Figure 1.

The admitted prior art teaches a holographic memory system comprising: a light source for generating a reference beam having a wavelength (100); and a photodetecting device for detecting a reconstructed signal beam corresponding to the reference beam (112 of Fig. 1), the photodetecting device selectively detecting light of a wavelength band including a wavelength of the reconstructed signal beam.

Art Unit: 2872

It is noted that photodectors always operate within a predetermined band of wavelengths.

Claims 5 and 6 are rejected under 35 U.S.C. 102(b) as being anticipated by Lawandy and under 35 U.S.C. 102(e) as being anticipated by Vo-Dinh.

Lawandy or Vo-Dinh discloses a photodetecting device for use in a holographic system, the photodetecting device comprising: a laser line band-pass filter (Lawandy, 24 of Fig. 1b; Vo-Dinh, 22 of Fig. 1) for transmitting light of a wavelength band while blocking light having a wavelength deviating from the wavelength band; and a photodetecting unit (Lawandy, 26 of Fig. 1b; Vo-Dinh, 24 of Fig. 1) for detecting the light transmitted through the band-pass filter.

Allowable Subject Matter

Claims 2-4 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 2-4 are allowable over the prior art of at least the reason that the prior art fails to teach or reasonably suggest the photodetecting device including the band-pass filter and the photodetecting unit as set forth in the claimed combination.
